Subject: RE: NRWC REA Wind Project - Environment Canada Comments

Hi Chris,

EC has reviewed the Supplemental Monitoring program for the proposed Niagara Region Wind Farm project, and is satisfied that all of EC's recommendations have been incorporated into the program.

If you have any questions at all, please let me know.

Best regards,
Sheryl

Subject: RE: NRWC REA Wind Project - Environment Canada Comments

Sheryl,

Further to my email on May 13, 2014, I am following up on the status of your review of the Supplemental Monitoring program being proposed for the NRWC project in Niagara. If you or your staff have any comments or questions, or wish to discuss specifics about the submission, please feel free let to give me a call.

Further, MOE received the attached comments from the MNR with respect to the implications of the supplemental monitoring program to the Environmental Effects Monitoring Plan(EEMP) already accepted by the MNR.

The comments are consistent with the intent of our approach to the supplemental information being collected for EC. The EEMP commitments are meant to be implemented as per the EEMP, which are consistent across the Province, while the supplemental work for EC is a intended as a completely separate monitoring program. Data collection, analysis and reporting for these studies will be mutually exclusive and submitted under separate cover.

Thank you,

Chris
